

Jackpot ELEVATOR

Configuration: 3 Reels
Number of Lines: 1-9
Denomination: Multi
Class: II, III

Symbols:

Bonus Symbols and Features:

When 3 or more  index on an active payline of any reel from left to right, the Jackpot Elevator bonus is activated. The Player will select 3 rooms for each Bonus Symbol. After their selection, the doors open and animated characters board the elevator. The Player's selected rooms illuminate on the top as the simulated elevator drops characters off on various floors. As they exit the elevator, the animation is displayed

on the main screen. The Player watches anxiously since they win the award displayed on their selected rooms if a character goes to that room. The anticipation builds when the elevator stops on a floor with the Players selected rooms since it's then a 1 in 6 chance of winning that award. A door prize is awarded for no wins.

When  indexes on an active payline of reel 3 with 2 identical symbols on reels 1 and 2, the elevator will move up to one of the floors to quickly multiply the jackpot. This symbol is only wild for symbols on same payline of reels 1 and 2.
