Blooming BONUS

Symbols:

Bonus Symbols and Features:

Blooming Bonus slots feature a mechanical top box game with one dozen roses that when selected during the bonus round, bloom / open to reveal bonus numbers and / or or multipliers via an LED display that is hidden inside of each rose.

The Bonus is activated when **3** indexes on the third reel of an active payline. The Player will bloom one color of the bouquet at a time in a match style bonus round, by selecting the rose they think will have the same bonus award number as the previously selected rose.

A multiplier rose is wild and will multiply the award of the previously selected rose, or the next rose if the multiplier rose is awarded first. Either way, after a multiplier rose is awarded, the next rose the player selects may have any bonus number since the last rose was wild. The bonus round is over when the Player selects a rose that does not match the previous rose.
